

Receive and send orders and other related documents in electronic format.

ABOUT Zen E-Orders

Zen E-Orders was conceived and designed to act as a platform that connects the intermediary NSO and the ERP of the supplier, in order to make it easier and more streamlined loading orders from the intermediary onto the ERP.

ZenE-orders

The goal is to intercept orders from public administrations and extract data within them to be entered into the supplier's ERP; this avoids complex and difficult management of the order.

See what our CEO is saying:

"We help our customer create value by providing him with the right information at the right time, in order to trigger a prompt and correct response to both internal and external customers."

Carlo Guarino, CEO, Interzen Consulting

WHAT WE OFFER

- Receiving and sending electronic orders on the NSO Italian network;
- Receiving and sending electronic orders on the European network PEPPOL;
- Data extraction from received electronic orders;
- Integration with ERP for data export from received orders.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
