Manage your projects in an integrated way

ZenProject allows users to monitor and control the progress of projects and, on the basis of updated data, regularly check actual times and costs to be within limits set in the contracting phase.

CHALLENGES

- Plan phases of activities and tasks for each project;
- Set budgets and work timelines;
- Reduce errors;
- Control over timing, actual costs and marginality of projects;
- Manage purchase requests/orders;
- Intercept any critical issues

IDEAL SOLUTION

- Resource and workflow management;
- Control on performance levels;
- Information management and control;
- Definition of corrective actions;
- Assessment of budget variations.

DESIRED OUTCOMES

Strategic features for a global vision and cutting-edge control over the progress of job orders, to manage projects from A to Z.

Improve productivity creating a culture of continuous enhancement.

ZenProject

ZenProject

ZenProject is a solution:

- **Scalable**, as it is based on the growth of the company;
- **Reliable**, with high levels of security and continuity of service;
- **Compliant** with regulations in force on documents management.

1

JOB ORDER MANAGEMENT

Keep the progress projects under control. Specific and fully usable features thanks to a simple and comprehensive interface for organizing and managing orders.

2

WBS AND TASK MANAGEMENT

Check the progress of projects. Features designed for planning phases, activities, tasks, the optimal allocation of resources, the setting of deadlines.

3

GANTT AND KANBAN BOARD

Keep an eye on time and resource usage. Tools to achieve a coordinated and effective management of resources during development of projects.

ZenProject & Microsoft Azure

ZenProject is a web application provided as SaaS. Therefore, data protection and information security become crucial. This led Interzen to select Microsoft Azure, one of the best Cloud Service Platforms actually available on the worldwide market.

DOCUMENT DATA

ZenProject is configured to protect stored data and documents through different cyber security measures.

SMARTWORKING

ZenProject can be accessed by different devices (laptop at the office, PC at home, tablet in out of office events).

CYBERSECURITY

Microsoft Azure complies with the widest range of legal and regulatory standards in industries and geographic areas.

Customer success: how to constantly track multiple projects with a single tool.

ZenProject helps consulting firms to monitor the progress of different projects at the same time; quick and easy access to tasks and resources offers good control over timeline and project costs.

Needs

Phases and tasks of projects will follow the detail of activities provided in the contract. The customer will manage multiple projects with cross-allocation of human resources. Have human resources quickly and easily update time sheet data.

Goals

Streamline the process of opening new work orders in the project management tool. Keep workloads constantly under control, in order to meet interim and final deadlines of projects. Reliable progress of work orders thanks to updated time sheet data.

Benefits obtained

Time saving and error cutting when opening and managing projects. Prompt alert for work overloads on human resources as well as the nearing of set milestones. Full overview of company's portfolio as a whole.
